SMART BABY MONITOR RANGE EXTENDER

## KODAK CHERISH Range Extender for Video Baby Monitor with HD Camera

### Extend the range of the Video Baby Monitor with HD Camera by 2X.

The KODAK CHERISH Video Baby Monitor and the HD Camera can support distance of 200m with direct line of sight. However, in the home environment, the range can decrease significantly due to the RF interference, barriers, walls and cabinets in between. With the Baby Monitor Range Extender, the range can be extended 2X and more, depending on the location of the Range Extender. Ideally, the range extender should be placed in between the Video Baby Monitor and the HD Camera.

### Easy Setup via App

After using the KODAK Smart Home App to setup the camera, use the same app to setup the Range Extender with the Video Baby Monitor to extend the range.

Once the setup is completed, the range extender can work even without the home router. This means user can bring along the Video Baby Monitor, the HD Camera and the range extender for travel or anywhere and yet able to enjoy a reliable connection and farther range between the Video Baby Monitor and the HD Camera.

### KODAK Smart Home App

Download the KODAK Smart Home App from the APP STORE (iOS) or GOOGLE PLAY Store (Android).
